Heat of combustion according to EN ISO 1716:2002

Product

Elmotech - Lightly pigmented chrome tanned leather from cattle hide.
Nominal thickness 1,4 mm. (The nominal thickness is determined by SP)

Purpose of test

Basis for technical fire classification.

Method

Heat of combustion: SP 0547 (=EN ISO 1716)

Conditioning

The sample is not conditioned.

Date of test

Week 6, 2003

Results

Gross heat of combustion at
constant volume, MJ/kg 20,55

The test results relate to the behaviour of the test specimens of a product under the particular conditions of the test; they are not intended to be the sole criterion for assessing the potential fire hazard of the product in use.

The revision is made on April 1, 2003 and concern the date.
